Dr Paul Cracknell	MBChB (Bristol 1990) MRCGP BSc (Hons) DRCOG
Dr Stephen Shaw	MBChB (Dundee 1990)
Dr Hena Brar	MBBS, MD (Gent 1996) DRCOG DFFP
Dr Greg Strachan	MBChB (Sheffield 1996) DRCOG MRCGP
Dr Daniel Sullivan	MBChB (Manchester 2006) MRCGP MRCPCH

THE AREA

Killamarsh Medical Practice serves the Parish of Killamarsh in North East Derbyshire and is situated close to the borders of Sheffield, Rotherham and Nottinghamshire, with easy access to Junctions 30 and 31 off the M1.

The excellent Rother Valley Country Park and Water Sports Centre is nearby and we are within easy reach of the Derbyshire Peak District.

Killamarsh used to be a thriving mining area. New housing developments followed pit closures in the 1980s and many people now commute to work in nearby Sheffield.

THE PRACTICE

This is a long established practice with a strong feeling of stability and a well-defined ethos and sense of purpose, operating under a PMS contract.

The practice is part of the North East Derbyshire Primary Care Network serving approximately 40,000 patients via four member practices: Barlborough Medical Practice, Killamarsh Medical Practice, The Springs Medical Partnership and The Valleys Medical Partnership.

We aim to provide easily accessible high quality care whilst considering the quality of life of all practice employees.

We have always strived to be excellent, innovative providers of care. This has placed us in a strong position in terms of resource allocation and budgetary position.

Our clinical system is TPP SystemOne and INRstar. We are a paper-light practice and have well-structured administration systems. We use the Integrated Clinical Environment (ICE) for laboratory reports and imaging results and have electronic discharge letters from hospital.

We are pleased to score consistently highly on GP Patient Surveys. Our Friends and Family feedback shows that 90% of our patients would recommend the practice to friends and family and 95% are happy with our opening hours.

Our high scores on accessibility are attributable to our 'today's work today' system. This allows both 6 week advanced booking of appointments (online) and 24 hour availability without recourse to triage.

We score maximum Quality & Outcomes Framework (QOF) points and provide a range of enhanced services.

We have a close working relationship with Derbyshire CCG and attend regular meetings. We have good links with the Medicines Management team who provide prescribing support in the surgery.

THE PATIENTS

Our list size is currently around 9,100 patients and is expected to increase over the next few years.

Killamarsh has average unemployment for Derbyshire but rates less deprived than average. Our age-sex profile indicates we have fewer elderly than average and more 10-30 year olds. By working with a consistent team of community staff and a stable, geographically compact population, we can achieve a high degree of continuity.

THE PREMISES AND SERVICES

Our original premises were built 25 years ago on the site of the original village cinema. To maintain a well-equipped purpose built premises, we have extended three times. We finished our third extension in 2016 increasing our consultation room capacity by seven, adding new toilet facilities and re-furbishing our treatment room.

The practice is open 8am to 6.30pm Monday to Friday. Surgeries run from 8:00am-10.30am and 4.00pm-6.30pm (no evening surgery on Wednesday). Patients that ring in the morning are usually seen the same day after morning surgery.

The Doctors have no OOH commitments at present, do not work on weekends. We provide 'extended hours' on Monday and Thursday by providing an earlier start at 7.15am. Patients can access an 'extended access' hub provided by The Valleys Medical Partnership in the evenings and weekends.

Each Doctor and Nurse has their own fully furnished consulting room and shares the use of a well-equipped treatment room.

In addition to the usual GP services, we have a multi-disciplinary mental health team offering counselling and CBT, a Community Practice Nurse and a Care Co-ordinator. We provide

undergraduate teaching to medical students, student nurses, and physician associates from Sheffield

In 2013 we built a new pharmacy attached to the surgery with its own front entrance and a link to the reception area. The pharmacy operates a 100 hour contract and is open 7am-10pm 6 days a week and 7am-5pm on Sunday.

THE STAFF

We have a very experienced and cheerful team of receptionists, admin staff and nurses.

Our 6 receptionists work well as a cohesive team and are flexible and their loyalty has contributed greatly to the stability of the Practice.

The practice has 2 Practice Nurses and 2 Health Care Assistants (HCAs).

Our Practice Nurses are very experienced and run our Diabetic, Asthma and COPD clinics. Our HCAs do blood taking, BP checks, foot checks, NHS health checks, flu jabs, ECGs and spirometry.

We have an employed Pharmacist, the newest member of our team, who is responsible for repeat prescription re-authorisation checks and adding medication from hospital discharge letters. We are also supported by Derbyshire Medicines Management Team via a pharmacist and technicians who perform drug searches and switches.

We have attached Physiotherapists and Mental Health Teams, who have rooms in our surgery allowing integrated care. Health visitors, District Nurses and Midwives work from locality hubs and attend regular meetings.

The North East Derbyshire Primary Care Network is continuously growing. We have currently employed a pharmacist, 2 social prescribing link workers and are currently recruiting 2 first contact physiotherapists.

THE PARTNERSHIP

We have 3 full-time partners, 2 part-time partners and 1 part-time salaried GP. We work in a very close team with shared values and we focus on providing accessible, high quality, traditional family care. We support each other intellectually and emotionally by daily informal contact after morning surgery.

Out of Hours is provided by Derbyshire Health United between 6.30 pm and 8 am and on weekends and bank holidays.

The partnership achieves above average net income by maximising our NHS income. This includes anticoagulation and rheumatology monitoring and providing care for the patients in the local nursing homes.
